- **U4 Landstraße:** Approximately a ten-minute walk via Hintere or Vordere Zollamtsstraße

Trams

- **Line 2** (Station Julius-Raab-Platz)
- **Lines 0 and 1** (Station Hintere Zollamtsstraße)
- **Plan your route here:** <https://route.bmk.gv.at/>

Waste Management

Please avoid producing waste. Waste avoidance encompasses both the reduction of waste quantity through reuse and the extension of product lifespans, as well as preventing harmful impacts of waste on the environment and health and avoiding harmful products.

Waste Separation

Paper, organic waste, packaging made of glass, metal, plastic, and composites, as well as hazardous materials, are recyclable secondary raw materials. Proper separation is therefore very important for both economic and ecological reasons. For more information on proper waste separation, please visit the website of the Ministry for Climate Protection: www.bmk.gv.at
