Public consultation on connected and automated mobility

We want your opinion: automated and connected mobility has far-reaching effects on our society. As part of the CARTRE project, you are invited to give your opinion on various aspects of this topic. The outcomes will be presented at the CAD Symposium on the 19th and 20th April and published on the CARTRE-website. [>>> more](#)

eCall – Automatic Emergency Call after a Road Accident

The new European legal standard for the automatic emergency call service "eCall" will become effective

Linking Danube: Multimodal Journey Planning Services

Most of the travel information systems have emerged in an urban or regional context and are therefore limited to local and regional modes of transport and contain few cross-border or demand-side information. The Linking Danube project is aiming to link isolated regional multimodal travel information systems across borders. [>>> more](#)

TRA2018: Pupils design their future means of transport

At TRA2018 workshops with students will take place in cooperation with the Austrian ScienceCenter-Network (SCN). Five school classes are considering the mobility of the future: What does a future means of transport look like, who are the users, which materials will be used and where will the energy come from? At TRA2018 students will then present their ideas and discuss them with experts. [>>> more](#)
