

# Electromobility in Austria

Facts & Figures  
Mai 2021

## Highlights in Mai 2021

In Mai, 4,216 electric vehicles were newly registered in Austria and the stock has risen to 77,492. Compared to other federal states, Vorarlberg has a BEV share of 18.27% in new registrations. The VW ID.3 is the most popular BEV model with 379 new registrations in Mai 2021. In the comparison of brands VW leads with around 22% market share. The monthly Facts & Figures-sheet offers a compact overview of current developments in the electromobility. As a federal agency, AustriaTech assumes the role of an expert organisation and prepares the data factually and neutrally.

Electromobility in Austria, May 2021

## New registrations of e-vehicles of category M1 per month (for Austria)

In the comparative period since February 2017, there has been a steady upward trend in the newly registered e-vehicles. In May 2021, 2,709 BEV (+13% to the previous month), 1,507 PHEV (+15% to the previous month) and zero FCEV (-100% to the previous month) were newly registered. The share of new registrations of e-vehicles in May 2021 was 18.74%.

## New registrations of e-vehicles of category M1 by year (for Austria)

From January to May 2021, 11,733 BEV, 6,541 PHEV and three FCEV were newly registered. Compared to May 2020, new registrations of BEV increased by 269%, PHEV new registrations increased by 203% and FCEV new registrations have stayed the same. The e-vehicle share of category M1 registrations from January to May 2021 is 16.87%.

## New registrations of BEV cars of category M1 by model (May 2021)

## BEV market share 2021 (M1)

In the period from January to May 2021 the most popular model was the Tesla Model 3 with 1,787 units, followed by the VW ID.3 with 1,443 units and the VW ID.4 with 984 units. The most popular model in May was the VW ID.4 with 379 units, followed by the Skoda Enyaq with 378 units and the VW ID.4 with 265 units. In the market share of new registrations from May 2021, VW takes first place with around 22%, followed by Tesla with around 15% and then Renault with around 8%.

# Facts & Figures

Electromobility in Austria, May 2021

## Population of e-vehicles of category M1 over time (for Austria)

While the number of battery electric vehicles rose moderately between 2010 and 2012 (approximately 1,400 in 2012), the number of electric vehicles has risen sharply since then, including in May 2021. As of the end of May 2021, 77,492 electric vehicles were on the roads of Austria, corresponding to a share of the total population of 1.51%.

## Publicly accessible charging points in Austria

The figure shows publicly available normal and fast charging points according to Directive 2014/94/EU per federal state. In total, there were 6,660 normal charging points and 1,299 fast charging points after the first quarter of 2021. At this moment there are around ten e-cars (BEV and PHEV) per NLP and around 54 per SLP in Austria. There are a total of 7,959 charging points in Austria, where there are around nine e-cars per charging point.

## About AustriaTech

AustriaTech is a 100% subsidiary of the Federal Ministry of Climate Action, Environment, Energy, Mobility, Innovation and Technology (BMK). It acts as an integrator in the field of mobility and supports the transformation processes towards an ecological, efficient and modern transport system. The activities range from new services and digital infrastructure to automated mobility. Electromobility activities include a continually monitoring and annual electromobility highlights, as well as participation in various working groups and supporting actions in ongoing activities such as subsidies, research programs and guidelines.
