

Electromobility in Austria

Facts & Figures
August 2021

Highlights in August 2021

In August, 4,327 electric vehicles were newly registered in Austria and the stock has risen to 89,946. Compared to other federal states, Upper Austria has a BEV share of 21.99% in new registrations. The VW ID.3 is the most popular BEV model with 325 new registrations in August 2021. In the comparison of brands VW leads with around 20% market share.

The monthly Facts & Figures-sheet offers a compact overview of current developments in the electromobility. As a federal agency, AustriaTech assumes the role of an expert organisation and prepares the data factually and neutrally.

Electromobility in Austria, August 2021

New registrations of e-vehicles of category M1 per month (for Austria)

In the comparative period since February 2017, there has been a steady upward trend in the newly registered e-vehicles. In August 2021, 3,200 BEV (+61% to the previous month), 1,126 PHEV (-4% to the previous month) and one FCEV (-50% to the previous month) were newly registered. The share of new registrations of e-vehicles in August 2021 was 24,42%.

New registrations of e-vehicles of category M1 by year (for Austria)

From January to August 2021, 20,537 BEV, 10,242 PHEV and seven FCEV were newly registered. Compared to August 2020, new registrations of BEV increased by 184%, PHEV new registrations increased by 77% and FCEV new registrations increased from zero to one unit. The e-vehicle share of category M1 registrations from January to August 2021 is 17.90%.

Facts & Figures

Electromobility in Austria, August 2021

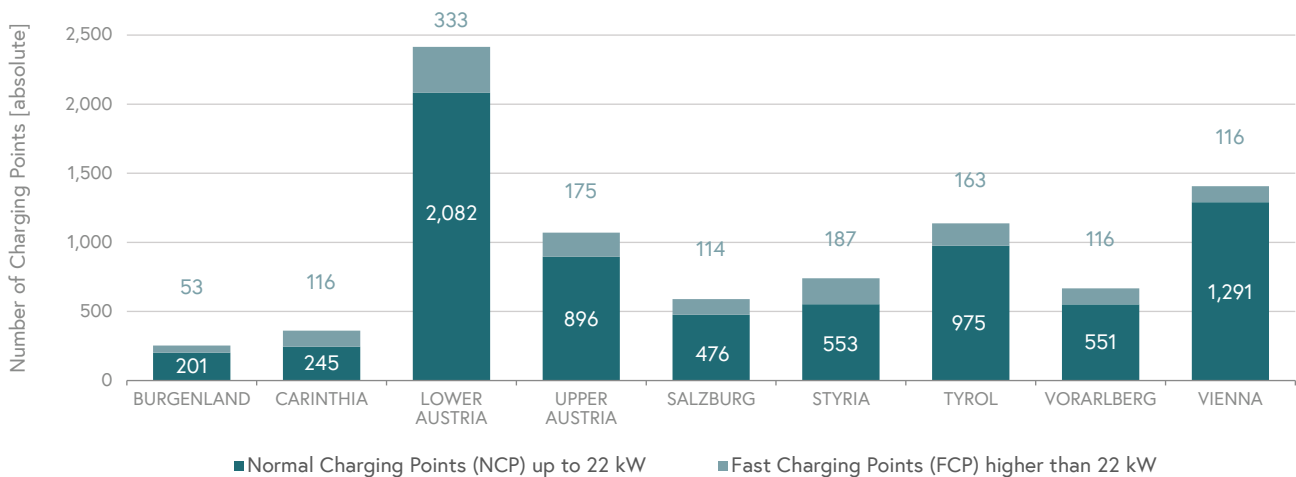

Population of e-vehicles of category M1 over time (for Austria)

While the number of battery electric vehicles rose moderately between 2010 and 2012 (approximately 1,400 in 2012), the number of electric vehicles has risen sharply since then, including in August 2021. As of the end of August 2021, 89,946 electric vehicles were on the roads of Austria, corresponding to a share of the total population of 1.75%.

Publicly accessible charging points in Austria

The figure shows publicly available normal and fast charging points according to Directive 2014/94/EU per federal state. In total, there were 7,270 normal charging points and 1,373 fast charging points after the second quarter of 2021. At this moment there are around eleven e-cars (BEV and PHEV) per NCP and around 60 per SLP in Austria. There are a total of 8,643 charging points in Austria, where there are around ten e-cars per charging point.

About AustriaTech

AustriaTech is a 100% subsidiary of the Federal Ministry of Climate Action, Environment, Energy, Mobility, Innovation and Technology (BMK). It acts as an integrator in the field of mobility and supports the transformation processes towards an ecological, efficient and modern transport system. The activities range from new services and digital infrastructure to automated mobility. Electromobility activities include a continually monitoring and annual electromobility highlights, as well as participation in various working groups and supporting actions in ongoing activities such as subsidies, research programs and guidelines.
