

# Electromobility in Austria

Facts & Figures  
November 2020

## Highlights in November 2020

In November, 3,086 electric vehicles were newly registered in Austria and the stock has risen to 56,053. Compared to other federal states, Styria has a BEV share of 14.14% in new registrations. The VW ID.3 is the most popular BEV model with 523 new registrations in November 2020. In the comparison of brands Tesla leads with around 20% market share. The monthly Facts & Figures-sheet offers a compact overview of current developments in the electromobility. As a federal agency, AustriaTech assumes the role of an expert organisation and prepares the data factually and neutrally.

## New registrations of e-vehicles of category M1 per month (for Austria)

In the comparative period since January 2016, there has been a steady upward trend in the newly registered e-vehicles. In November 2020, 2,061 BEV (+31% on the previous month), 1,024 PHEV (-2% on the previous month) and one FCEV (-80% on the previous month) were newly registered. The share of new registrations of e-vehicles in November 2020 was 15.39%.

## New registrations of e-vehicles of category M1 by year (for Austria)

From January to November 2020, 12,581 BEV, 6,503 PHEV and 13 FCEV were newly registered. Compared to November 2019, new registrations of BEV increased by 216%, PHEV new registrations increased by 245% and FCEV new registrations have remained the same. The e-vehicle share of category M1 registrations in November 2020 is 8.49%.

# Facts & Figures

Electromobility in Austria, November 2020

## New registrations of BEV cars of category M1 by Austrian federal state (November 2020)

Compared with other Austrian federal states, Styria has the highest percentage of BEV in newly registered passenger cars at 14.14%, followed by Vorarlberg (11.75%) and Salzburg (11.56%). Austria has a BEV share of 10.28%. In the absolute number of newly registered BEV, Vienna is ahead with 410, followed by Styria (355) and then Upper Austria (350).

## New registrations of BEV cars of category M1 by model (November 2020)

## BEV market share 2020 (M1)

In the period from January to November 2020 the most popular model was the Tesla Model 3 with 2,205 units, followed by the Renault Zoe with 1,782 units and the Kia E-Niro with 1,013 units. The most popular model in November was the VW ID.3 with 523 units, followed by the Tesla Model 3 with 191 units and the Renault Zoe with 129 units. In the market share of new registrations from January to November 2020, Tesla takes first place with around 20%, followed by Renault with around 14% and then VW with around 13%.

# Facts & Figures

Electromobility in Austria, November 2020

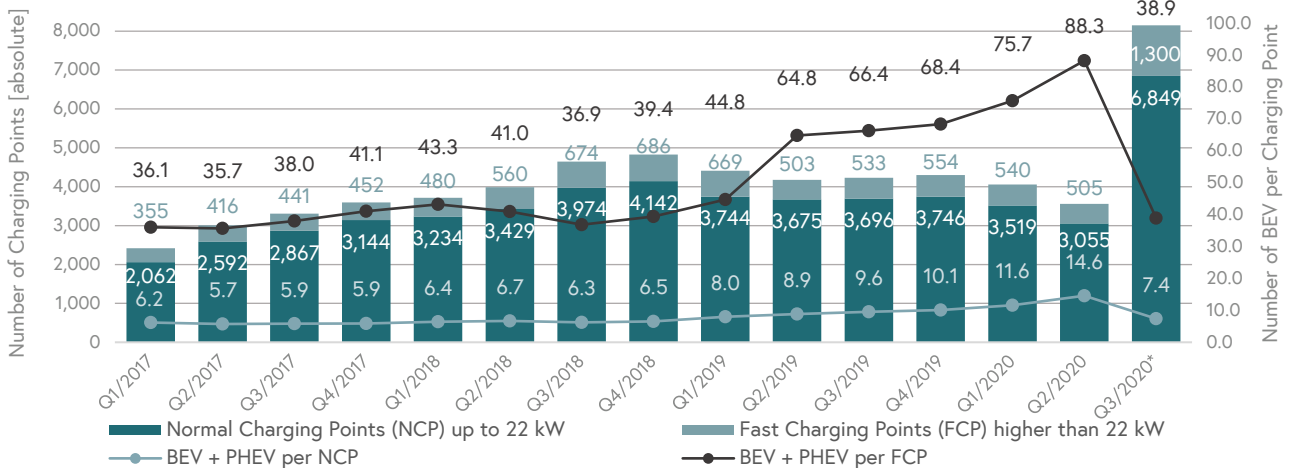

## Population of e-vehicles of category M1 over time (for Austria)

While the number of battery electric vehicles rose moderately between 2010 and 2012 (approximately 1,400 in 2012), the number of electric vehicles has risen sharply since then, including in November 2020. As of the end of November 2020, 56,053 electric vehicles were on the roads of Austria, corresponding to a share of the total population of 1.10%.

Source: Statistics Austria; Data status: 31.12. of the corresponding year respectively 30.11.2020; Hydrogen vehicles are not included in this illustration for illustrative purpose; Illustration: AustriaTech

## Publicly accessible charging points in Austria

The figure shows publicly available normal and fast charging points according to Directive 2014/94/EU. In total there are 6,849 normal charging points and 1,300 fast charging points until the end of the third quarter of 2020. At this moment there are about seven electric cars (BEV and PHEV) on one NCP and about 39 on a FCP.

Source: e-tankstellen-finder.com; Data status: at the end of each quarter of the respective year; Illustration: AustriaTech

\*Due to database adjustments, the number of charging points decreased since Q1/2019 and Q2/2020. This reduction was only in the underlying database, effectively the charging points did not decrease. Most of these adjustments have now been corrected, resulting in the appearance of a sharp increase in charging points.

## About AustriaTech

AustriaTech is a 100% subsidiary of the Federal Ministry of Climate Action, Environment, Energy, Mobility, Innovation and Technology (BMK). It acts as an integrator in the field of mobility and supports the transformation processes towards an ecological, efficient and modern transport system. The activities range from new services and digital infrastructure to automated mobility. Electromobility activities include a continually monitoring and annual electromobility highlights, as well as participation in various working groups and supporting actions in ongoing activities such as subsidies, research programs and guidelines.
