

Electromobility in Austria

Facts & Figures
July 2022

Highlights in July 2022

In July, 3,251 electric vehicles were newly registered in Austria and the stock has risen to 130,264. Compared to other federal states, Upper Austria has a BEV share of 18.00% in new registrations. The CUPRA Born is the most popular BEV model with 296 new registrations in July 2022. In the comparison of brands Tesla leads with around 14% market share.

The monthly Facts & Figures-sheet offers a compact overview of current developments in the electromobility. As a federal agency, AustriaTech assumes the role of an expert organisation and prepares the data factually and neutrally.

Facts & Figures

Electromobility in Austria, July 2022

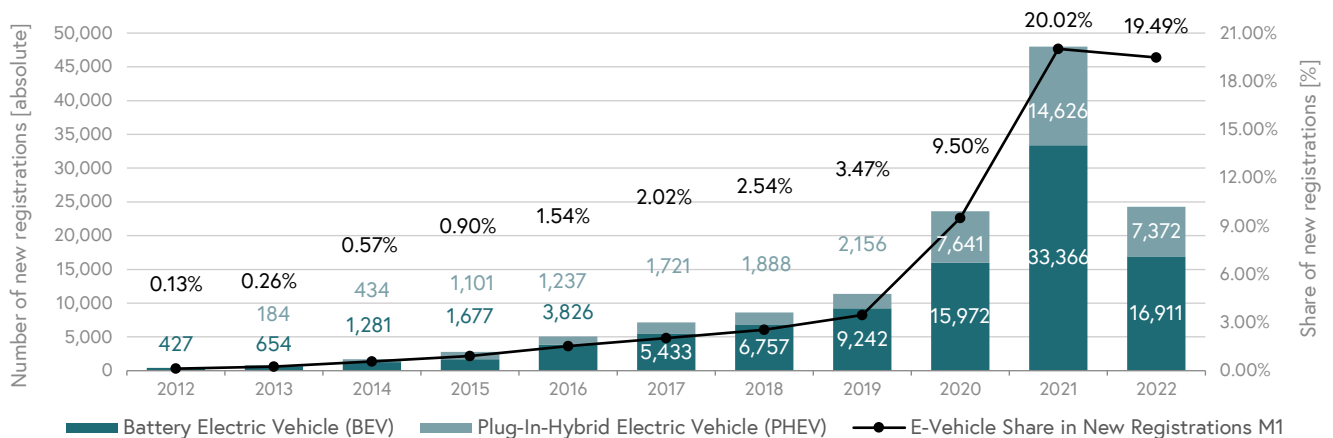

New registrations of e-vehicles of category M1 per month (for Austria)

In the comparative period since April 2017, there has been a steady upward trend in the newly registered e-vehicles. In July 2022, 2,418 BEV (-29% to the previous month), 830 PHEV (-30% to the previous month) and three FCEV (three units more in comparison to the previous month) were newly registered. The share of new registrations of e-vehicles in July 2022 was 20.25%.

New registrations of BEV cars of category M1 by model (July 2022)

BEV market share 2022 (M1)

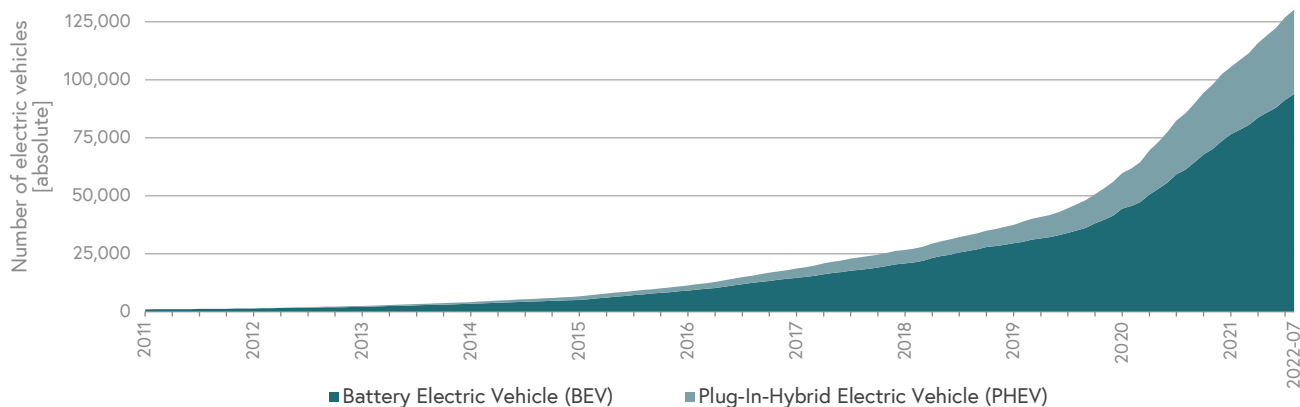

In the period from January to July 2022 the most popular model was the Tesla Model Y with 1,947 units, followed by the CUPRA Born with 1,485 units and the ŠKODA ENYAQ with 1,028 units. The most popular model in July was the CUPRA Born with 296 units, followed by the ŠKODA ENYAQ with 220 units and the VW ID.4 with 198 units. In the market share of new registrations from January to July 2022, Tesla takes first place with around 14%, followed by CUPRA with around 9% and then BMW with around 9%.

Publicly accessible charging points in Austria

The figure shows publicly available normal and fast charging points according to Directive 2014/94/EU per federal state. As of 1st July 2022, there were a total of 11,730 normal charging points and 2,061 fast charging points throughout Austria. At this moment there are around eleven e-cars (BEV and PHEV) per NLP and around 62 per SLP in Austria. There are a total of 13,791 charging points in Austria, where there are around nine e-cars per charging point.

About AustriaTech

AustriaTech is a 100% subsidiary of the Federal Ministry of Climate Action, Environment, Energy, Mobility, Innovation and Technology (BMK). It acts as an integrator in the field of mobility and supports the transformation processes towards an ecological, efficient and modern transport system. The activities range from new services and digital infrastructure to automated mobility. Electromobility activities include a continually monitoring and annual electromobility highlights, as well as participation in various working groups and supporting actions in ongoing activities such as subsidies, research programs and guidelines.
