

Electromobility in Austria

Facts & Figures
July 2019

Highlights in July 2019

In July, 815 electric vehicles were newly registered in Austria and the stock has risen to 32,900. Compared to other federal states, Vorarlberg has a BEV share of 3.81% in new registrations. The Tesla Model 3 is the most popular BEV model with 111 new registrations in July 2019. In the comparison of brands Tesla leads with around 34% market share. The monthly Facts & Figures-sheet offers a compact overview of current developments in the electromobility. As a federal agency, AustriaTech assumes the role of an expert organisation and prepares the data factually and neutrally.

Electromobility in Austria, July 2019

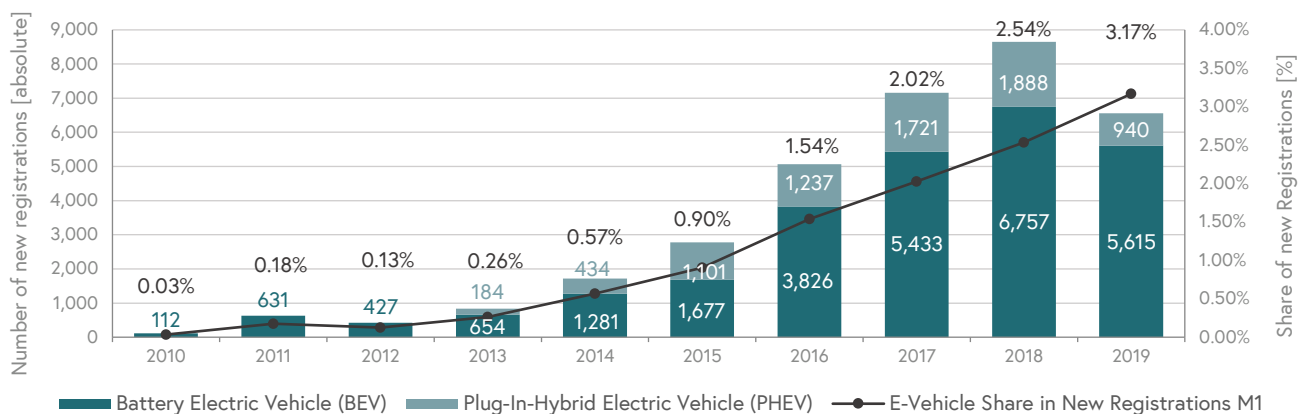

New registrations of e-vehicles of category M1 per month (for Austria)

In the comparative period since January 2016, there has been a steady upward trend in the newly registered e-vehicles. In July 2019, 711 BEV (-24% on the previous month), 101 PHEV (+2% on the previous month) and three FCEV (+50% on the previous month) were newly registered. The share of new registrations of e-vehicles in July 2019 was 2.59%.

New registrations of e-vehicles of category M1 by year (for Austria)

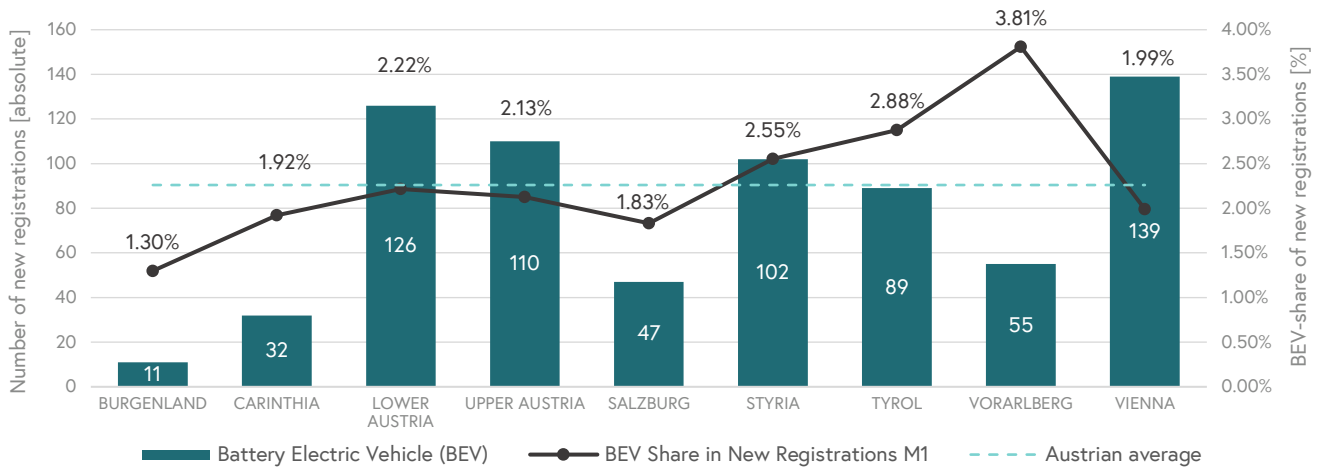

From January to July 2019, 5,615 BEV, 940 PHEV and twelve FCEV were newly registered. Compared to July 2018, new registrations of BEV increased by 57%, PHEV new registrations dropped by 35% and FCEV registrations rose from zero to three units. The e-vehicle share of category M1 registrations from January to July 2019 is 3.17%.

Facts & Figures

Electromobility in Austria, July 2019

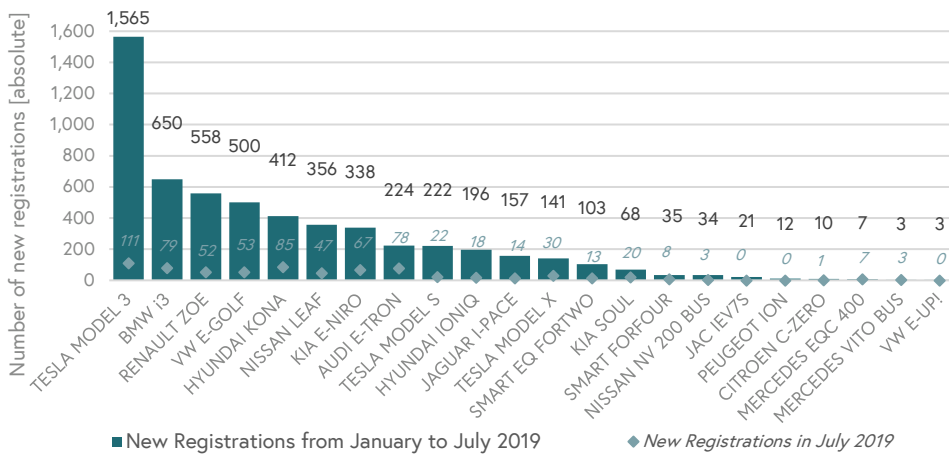

New registrations of BEV cars of category M1 by Austrian federal state (July 2019)

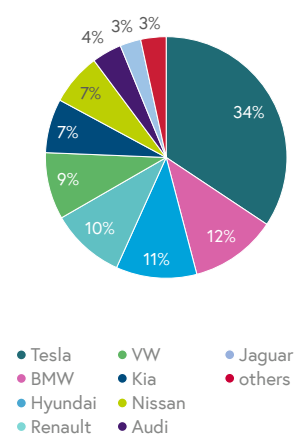

Compared with other Austrian federal states, Vorarlberg has the highest percentage of BEV in newly registered passenger cars at 3.81%, followed by Tyrol (2.88%) and Styria (2.55%). Austria has a BEV share of 2.26%. In the absolute number of newly registered BEV, Vienna is ahead with 139 e-cars, followed by Lower Austria (126) and then Upper Austria (110).

New registrations of BEV cars of category M1 by model (cumulated until July 2019)

BEV market share 2019 (M1)

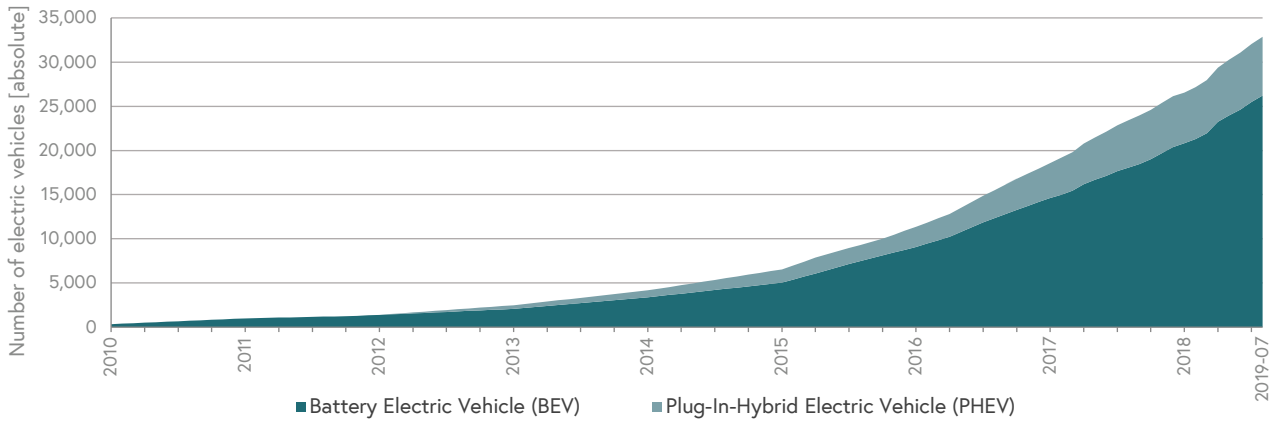

In the period from January to July 2019 the most popular model was the Tesla Model 3 with 1,565 units, followed by the BMW i3 with 650 units and the Renault Zoe with 558 units. The most popular model in July was the Tesla Model 3 with 111 units, followed by the Hyundai Kona with 85 units and the BMW i3 with 79 units. The market share of new registrations from January to July 2019, Tesla takes first place with around 34%, followed by BMW with 12% then Hyundai with around 11%.

Facts & Figures

Electromobility in Austria, July 2019

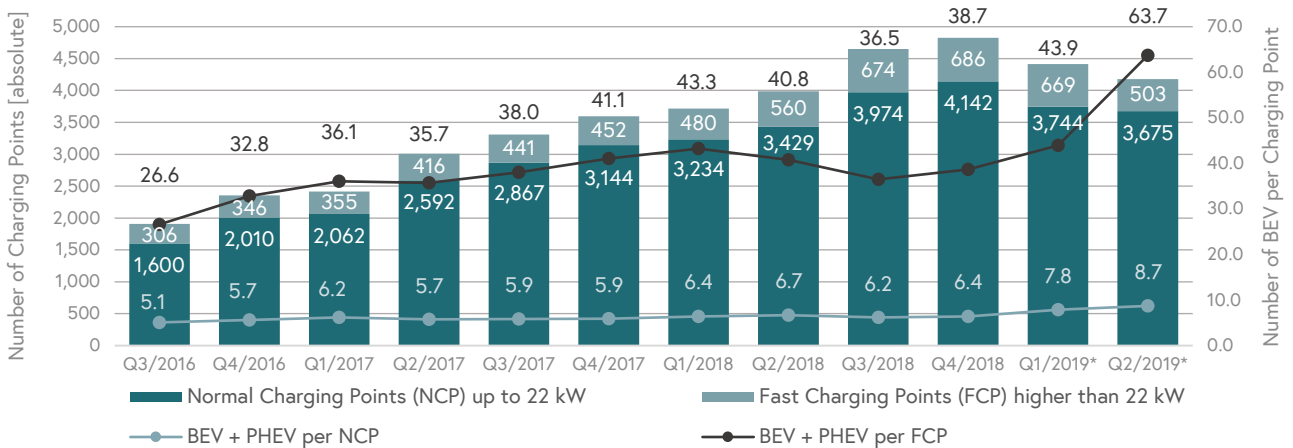

Population of e-vehicles of category M1 over time (for Austria)

While the number of battery electric vehicles rose moderately between 2010 and 2012 (approximately 1,400 in 2012), the number of electric vehicles has risen sharply since then, including in July 2019. As of the end of July 2019, 32,900 electric vehicles were on the roads of Austria, corresponding to a share of the total population of 0.65%.

Publicly accessible charging points in Austria

The figure shows publicly available normal and fast charging points according to Directive 2014/94/EU. In total there are 3,675 normal charging points and 503 fast charging points until the end of the second quarter of 2019. At this moment there are about nine electric cars (BEV and PHEV) on one NCP and about 64 on a FCP.

Source: <http://e-tankstellen-finder.com>; Data status: at the end of each quarter of the respective year; Illustration: AustriaTech

*Due to database adjustments, the number of charging points decreased since Q1/2019. This reduction was only in the underlying database, effectively the charging points did not decrease.

About AustriaTech

AustriaTech is a 100% subsidiary of the Federal Ministry of Transport, Innovation and Technology (BMVIT). It acts as an integrator in the field of mobility and supports the transformation processes towards an ecological, efficient and modern transport system. The activities range from new services and digital infrastructure to automated mobility. Electromobility activities include a continually monitoring and annual electromobility highlights, as well as participation in various working groups and supporting actions in ongoing activities such as subsidies, research programs, guidelines.
